DETAILED ACTION

Response to amendments

1. The reply file 01/24/05 consists of request for reconsideration and declaration of Brian Lemoff and remarks related to rejection of claims. The claims are not allowable as described below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3, 8-9, 11-19, 21 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Shahid (6560395).

Shahid (Figures 1-11) shows a parallel optical interconnect having a first holder 22 of ribbonized web material for holding a plurality of first terminal portions of first segments of a plurality of optical fibers 26 of a ribbon at a first predetermined pitch S1 and a second holder (optical subassembly (OSA)) 24 with pre-formed holes (grooves) for holding a plurality of second terminal portions of second portions of the fibers at a second pre-determined pitch S2 wherein the second predetermined pitch is greater than the first predetermined pitch and the second segment is a divergent arrangement of the optical fibers configured as a fan-out of the first segment. The first and second holders

are discrete body members with pre-formed holes. A common injection-molded housing, alignment pins and ferules around the second terminal portion are inherent.

Response to Arguments

4. The arguments have been considered but are moot in view of new grounds of rejections.

Conclusion

5. Applicant's request for reconsideration and submission of Lemoff's declaration necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
